EDUCATION

New Jersey Institute of Technology, Albert Dorman Honor's College, Ying Wu College of Computing *September 2021- May 2025*

Major*: Computer Science* **Minor***: Applied Mathematics* **Cumulative GPA: 3.916/4.00**

- Received full honors merit scholarship for all years of attendance and completed 30 volunteer hours/semester.
- Relevant coursework: Java, C++, Python, SQL, Probability & Statistics , Actuarial Mathematics, Database Systems, Quantitative Analysis with Business Problems, Data Structures and Algorithms, Multivariable Calculus

PROJECTS

Bank Database and Website Project (SQL, PHP, MySQL, HTML, CSS) *February – April 2023*

- Designed and implemented database requirements for a fictional banking institution on Oracle SQL Developer.
- Transferred database design to MySQL and used PHP to serve as the backend for a functional banking website that contains login pages, customer transaction functionalities, and employee management designed with HTML and CSS.

Machine Learning and AI for Advanced Manufacturing Optimization – Honor's Summer Research Institute NJIT (Python) *Current*

- Currently an undergraduate researcher developing a tree-based deep learning machine learning algorithm to run on real-time collected manufacturing data to optimize advanced manufacturing machines and processes.

Compiler for a Perl-Based Language (C++) *May 2023*

- Programmed a compiler for a Perl-Like Language by designing and coding a lexical analyzer and parser interpreter.
- The compiler parses, interprets, and displays correct outputs or associated error messages when given a file containing a program written in the Perl-Like language.

Quality Diversity Algorithms with Machine Learning – Undergraduate Research NJIT (Python) *January – March 2023*

- Utilized PyRibs Python library to conduct quality diversity algorithm research using video game level data generated from a GAN. Applied statistical algorithms to generated data to convey the direction and spread of results.

SKILLS

- **Technology Skills / Languages:** Java, C++, C, Python, HTML, CSS, JavaScript, SQL, MySQL, Git, PHP, GitHub, Bootstrap, MATLAB
- **Extra Skills:** Creative arts, 3D modeling, Data Visualization through Tableau, Microsoft Excel, and Matplotlib

LEADERSHIP AND EXPERIENCES

***Vice President*, Business Masterminds NJIT** *January 2022 - Present*

- Hosted Project Management Workshops to introduce students to SCRUM/Agile methodologies. Maintained connections with 10+ industry professionals/school alumni to serve as guest speakers in workshops and events.
- Initiated a collaboration with other technology clubs to host an AI in Business Workshop of 50+ attendees to teach how to leverage artificial intelligence tools to innovate business solutions.

***Financial Analyst* – Investment Fund NJIT** *September 2021 - Present*

- Analyzed various publicly traded companies found through conducting industry/market research to find viable long term growth investment opportunities to increase the value of the club's stock portfolio.
- Conducted research on companies online, read through official company reporting's (EDGAR) and utilized Microsoft Excel to analyze financial ratios to gain risk insights and calculate overall profitability. Utilized Bloomberg Terminal to access real time financial data.

Other Experiences: Women in Computing Society member, Spanish Honor Society

PROFESSIONAL EXPERIENCES

UPS (United Parcel Service), *Information Technology Intern* ***June 2023 – August 2023***

- Assigned to work on deploying O365 functionalities across the company.

Plymouth Rock Assurance, *Data Entry and Claims Intern* **June 2022 – August 2022**

- Utilized the department's data management systems to support data entry and analysis tasks. Gained interest and experience in the insurance industry and learned about fintech in insurance.

CERTIFICATIONS

- New Jersey State Seal of Biliteracy – Spanish, Gujurati
- Microsoft Office Specialist Word, PowerPoint Certification 2016, 2018, 2019
